BROCHURE

If you are an **association**, a **Government agency**, a **company**, a **municipality**, a **university** or a **union**...

Our Meeting Manager solution allows you to:

Simply and efficiently streamline your meeting

- Our team of experts will support you throughout the project
- Adapts to any kind of meeting, either onsite or virtual
- Supports proxy and weighted voting

Conduct secure and transparent voting processes

- Cutting-edge encryption technology
- Full result transparency
- Real-time results

Manage everything from any Internet-connected device

- Multi-device
- Live interaction with the meeting agenda and voting processes
- Integration with video conferencing tools

“ It was our first online general assembly with online elections, so it was helpful to be guided by the team to break down the votes, clarify voting options, and determine voting settings. It was also the first time for our members and the user-friendliness of the authentication process and voting platform were a key to the success of the event.”

Beryl Abols
Senior Event & Finance
Officer at ILGA Europe

How does *it work?*

Authentication

Meeting Manager supports a wide range of authentication mechanisms that verify attendees identities and prevents them from casting more than the allotted number of votes.

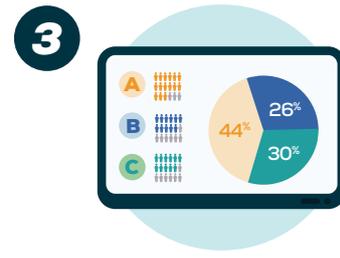

Once authenticated, users access the intuitive meeting platform where the agenda is displayed.

Vote

Attendees can access the items on the agenda and make their selections quickly and easily, all from their own device (smartphone, tablet, PC) and without the need for hardware or the installation of additional applications.

Once a vote is cast and stored, the attendee gets a voting receipt. This receipt allows the attendee to verify that their vote has been counted.

Count

Votes are encrypted on the on the attendee's own device and are sent securely to ensure their privacy and the integrity of the results.

Once voting is finished, the results are available for the meeting administrator to publish. Meeting Manager presents the results graphically and generates a file that can be attached to the final minutes of the meeting.

Our clients *trust us*
