BROCHURE

Our online **Results Consolidation** solution allows you to:

#### **Streamline the results tabulation process**

- Consolidate ballots from any voting channel: paper, postal, or online
- Transmit data electronically and immediately begin tabulation
- Customization applied for your election specifics

#### **Provide accurate and verifiable results**

- Tally sheets are transmitted with digital signatures to verify their integrity
- Correctness of each tally sheet is verified and cross-checked before tabulation
- Immutable logs record every step and can be audited by third parties

## **2019 Spanish Local and European Elections**

*On May 26, 2019, Spain held not only local elections for its municipalities and regional elections for the majority of its autonomous communities, but also national elections for the European Parliament. Scytl, alongside our partners Vector and ODEC, implemented our Results Consolidation solution for the simultaneous elections.*

Results consolidated from  
**+60,000** polling stations

**22,300** mobile reporting  
devices distributed

Results tabulated from  
**+23 million** voters

# How does *it work?*

## Configuration

Electoral models, including tally sheet templates, validation rules, electoral formulas, and thresholds, as well as contest specifics like candidate and party names and territorial structure are automatically uploaded to the system.

## Transmission

Tally sheets from each polling station or counting center are digitized, digitally signed, and securely transmitted for counting through a user-friendly data transmission interface customized for your election.

## Tabulation

Results are received and are cross-checked and further validated to ensure the integrity and accuracy of each tally sheet. Formulas are then applied to allocate seats as needed, and reports are generated.

# Our clients *trust us*
